

OpenVPN4UCS provides an integration of OpenVPN into the Univention Corporate Server. It allows any Univention Corporate Server to be configured as an OpenVPN server using the Univention Management Console for configuration.

Thanks to central administration OpenVPN4UCS provides connectivity for mobile users (road warriors) and other sites (site-to-site) in very few steps.

## Features

- granting OpenVPN access with just one click
- ready2go package with complete user configuration
- dynamic recreation of the ready2go package after server changes
- support for Linux and Windows clients out of the box
- access overview of connected users
- site-to-site networking (business edition)
- support for IPv4 and IPv6

*packages available via*

## Editions

OpenVPN4UCS is available in two variants:

### Personal Use Edition

- This edition is already available free of charge after installing OpenVPN4CS.
- It allows to create VPN access for up to 5 users.

### Business Edition

- includes all features from personal use edition
- Site-to-site networking is possible.
- includes 30 days installation support via e-mail
- price of base package incl. 10 users: 150 Euro per year
- price of expansion package incl. 5 users: 40 Euro per year
